DOBAR

MARKET ANALYSIS — BRAZIL

Payments, Competitors, Gateway Costs & Advertising Pricing Strategy

August 2026 · Confidential — Internal Use

Topic	Key Finding
iFood payment model	Acts as own gateway; weekly cycle; 15.2–26.5% total take rate
Zé Delivery model	Ambev product distribution; zero commission; not a direct competitor
Primary competitor	Goomer (merged Abrahão): 400k restaurants, flat R$40–699/mo, no commission
Pagar.me gateway cost (blended)	~3.5–4% effective per transaction (card-not-present e-commerce rates)
Maquininha physical cost	0.57–2.69% card fees + R$300–500/mo PDV system + hardware
Recommended Dobar take rate	8% Regular · 6% Master (+ R$199/mo) · 4% VIP (+ R$599/mo)

1. How iFood, Rappi & Zé Delivery Transact Money

1.1 iFood — Brazil's Dominant Platform

iFood operates as its **own embedded payment gateway** (branded internally as iFood Pay). When a customer pays online — via credit card, debit, PIX, or vale-refeição digital — the full order value flows into iFood's platform accounts, not to the restaurant. iFood retains the funds through a weekly apuration cycle (Monday–Sunday), deducts all fees, then repasses the net balance every Wednesday.

Payments made on delivery (cash or card machine on the driver's device) bypass the platform entirely and go directly to the restaurant or courier — iFood takes no cut on those.

Payment Method	Who Processes	When Restaurant Receives	Platform Revenue
Credit / Debit (online)	iFood Pay (own gateway)	Weekly — every Wednesday	Commission + payment fee deducted
PIX (online)	iFood Pay	Weekly — every Wednesday	Commission + payment fee deducted
Vale-Refeição (online)	iFood Pay + operator	Weekly — every Wednesday	Commission deducted
Cash on delivery	Direct to restaurant	Immediate	None (iFood waives)
Card machine on delivery	Direct to restaurant	Immediate	None (iFood waives)

1.2 iFood Fee Structure — What Restaurants Actually Pay

There are three distinct charges stacked on every online order:

Fee Type	Plano Básico	Plano Entrega (iFood logistics)	Notes
Commission on order value	~12%	~23%	Applied to gross order value
Payment processing fee	3.2%	3.5%	Applied to gross order value
Monthly platform fee	R$110/mo	R$150/mo	Waived if monthly GMV < R$1,800
Total per order (excl. monthly)	**~15.2%**	**~26.5%**	Combined commission + payment fee

> **Key Insight for Dobar**
> iFood's 15.2–26.5% all-in take rate is Dobar's primary competitive benchmark. Dobar is not primarily competing against the maquininha — it is competing against these marketplace rates for venues that want to build direct customer relationships.

1.3 iFood's Gateway Profit Layer

Beyond commission, iFood earns a spread on the payment processing fee (3.2–3.5%) charged to restaurants. Market e-commerce gateway costs in Brazil run approximately 2.5–3.5% for credit and 0.5–1.1% for PIX. iFood's own payment infrastructure — built on top of acquirers such as Stone, Cielo, and Rede — likely costs them 1.5–2.0% blended, generating an estimated

0.5–1.5% pure gateway margin on top of commission revenue.

The iFood Conta Digital also allows restaurants to keep balances on-platform and pay suppliers digitally, creating further float revenue for iFood.

1.4 Zé Delivery — Structurally Different, Not a Competitor

Zé Delivery is an Ambev-owned beverage delivery platform. Its economics are fundamentally different from an ordering platform like Dobar:

Dimension	Zé Delivery	Dobar
Revenue model	Product margin (Ambev sells with 20% distributor discount, earns on volume)	Transaction commission + subscription + advertising
Commission on sales	Zero — no commission charged to partners	4–8% (recommended revised rates)
Who pays	Customer buys from distributor at app price; Ambev profits from product	Customer pays full venue price; Dobar takes a commission
Use case	Beverage delivery to homes/offices	In-venue ordering at bars & restaurants
Competitor?	No — different channel, different product	Shares the "bar ecosystem" but different use case

Zé Delivery Strategic Note

Zé Delivery is actually a potential partnership target, not a competitor. Bars that use Dobar for in-venue ordering could cross-sell Zé Delivery for takeaway delivery. Ambev's distribution infrastructure and bar relationships could accelerate Dobar's B2B sales.

2. Brazilian Market: Competitor Landscape

2.1 Direct Competitors — In-Venue Digital Ordering

The most relevant competitive category for Dobar is not food delivery (iFood/Rappi) but the **in-venue digital ordering and QR code menu segment.**

Competitor	Pricing Model	Commission	Scale (2026)	Key Weakness vs Dobar
Goomer + Abrahão (merged)	R$40–699/month flat subscription	Zero on transactions	400k restaurants; 25k paying	No proprietary payment gateway; no consumer-facing app with discovery
Takeat	R$300–800/month (PDV + KDS + delivery ecosystem)	Zero on transactions	Growing — SMB restaurant focus	No nightlife/bar focus; complex onboarding; no consumer discovery app
Meniu	Freemium; R$49–149/month	Zero	Small — startup	Very basic; no payments; no analytics; no advertising products
Brendi	SaaS R$200–500/month (CRM + chatbot + loyalty)	Zero on transactions	Growing	Marketing/CRM tool, not a complete ordering + payment platform
Menu Digital (generic)	R$0–R$200/month	Zero	Fragmented market	No payment; no analytics; no consumer app; no advertising revenue

2.2 Delivery Platforms (Indirect Competitors)

These platforms compete for venue attention and budget but serve a fundamentally different use case (delivery, not in-venue). Their high fee structures are Dobar's best marketing argument.

Platform	Model	Total Take Rate	Payment Gateway	Brazil Status (2026)
iFood	Marketplace delivery + in-venue experiments	15.2–26.5%	Own (iFood Pay)	Dominant — ~78% market share
Rappi	Multi-category marketplace	~25–30%	Own (RappiPay)	Present — losing share to iFood
99Food / Keeta	Delivery marketplace	~20–25%	Partner gateways	Growing challenger post-Uber Eats exit
Uber Eats	Delivery marketplace	~18% (retorno 2026)	Uber Payments	Re-entering Brazil with lower commission pitch

2.3 Dobar's Defensible Differentiators

Differentiator	Goomer	iFood	Traditional Maquininha + PDV	Dobar
Consumer discovery app	❌	❌ (delivery only)	❌	✅ (in-venue, proximity-based)
In-venue live ordering	✅ QR code	❌	❌	✅ with real-time push to cashier
Integrated payment gateway	✅ (venue's own maquininha)	✅ (delivery only)	✅ (physical only)	✅ (API, e-commerce)
Advertising products	❌	Basic	❌	✅ (CPH, CPC, CPM campaigns)
Nightlife/bar focus	✅ (restaurant-first)	❌	❌	✅ (built for bars, events)
Real-time WebSocket orders	✅ (basic)	❌	❌	✅ (live cashier dashboard)
Analytics dashboard	Basic	Basic	❌	✅ (full, with customer data)
Event / mass venue scale	❌	❌	❌	✅ (designed for 100k+ concurrent)

3. Pagar.me/Stone: Actual Gateway Costs (e-Commerce)

The attached document from Pagar.me (dated 07/08/2026, account: Carlos A. Alves, CNPJ 59.296.735/0001-57, modality: e-Commerce) reveals the following official rates. These are

card-not-present (online/API) rates — inherently higher than physical maquininha due to fraud risk.

3.1 Fixed Fees Per Transaction

Fee	Value	Applies To	Notes
Processing fee	R$0.55	Every approved transaction	Fixed, regardless of order value
Antifraude	R$0.44	Credit card transactions only	Fraud prevention service
Transfer out	R$3.67	Each bank transfer to venue	Amortizes over weekly batch
Boleto fee	R$3.19	Each boleto issued	Not relevant for bars
Boleto estorno	R$3.19	Each boleto reversal	Not relevant for bars

3.2 Credit Card Rates — All Brands

Brand	À Vista	2x–6x	7x–18x	Settlement
Visa	3.19%	4.49%	4.99%	Due date of each installment
Mastercard	3.19%	4.49%	4.99%	Due date of each installment
Elo	3.19%	4.49%	4.99%	Due date of each installment
Amex	3.19%	4.49%	4.99%	Due date of each installment
Hipercard	3.19%	4.49%	4.99%	Due date of each installment

Note: Automatic antecipação is inactive. Weekends and holidays settle on next business day. Antecipação automática would accelerate settlement at additional cost.

3.3 PIX Rate

> **PIX — 1.09% + R$0.55 per transaction**
> PIX settles same day (after payment conciliation). For a R$50 order: gateway cost = R$0.55 + R$0.545 = R$1.095 (2.19% effective). This is significantly higher than physical maquininha PIX, which is commonly free or 0.35%. The difference is the e-commerce settlement infrastructure overhead.

3.4 Blended Effective Gateway Cost for Dobar

Assuming a typical Dobar transaction mix for a Brazilian bar — 55% PIX, 35% credit à vista, 10% debit — and an average order value of R$55:

Payment Method	Assumed Mix	Pagar.me % Rate	Fixed Fees	Effective Cost on R$55 Order	Effective %
PIX	55%	1.09%	R$0.55	R$0.60 + R$0.55 = R$1.15	2.09%
Credit à vista	35%	3.19%	R$0.55 + R$0.44 = R$0.99	R$1.75 + R$0.99 = R$2.74	4.98%
Debit (approx.)	10%	~1.5% (est.)	R$0.55	R$0.83 + R$0.55 = R$1.38	2.50%
Blended weighted average					**~3.5–3.7%**

> ⚠ **Critical Honesty Check**
> Pagar.me's e-commerce rates are higher than physical maquininha rates. This is structural — card-not-present transactions carry higher fraud risk. Ton/Stone card-present rates start at 0.75% credit vs Pagar.me's 3.19% e-commerce. Dobar must not claim "lower payment fees than maquininha" on a per-transaction basis. The correct claim is: Dobar's total cost of ownership (gateway + ordering system + customer acquisition) competes with maquininha + PDV system + marketing costs combined.

4. Pricing Strategy: Beat the Market, Stay Profitable

4.1 What Traditional Solutions Really Cost a Bar

To price competitively, we need the true all-in monthly cost of the status quo — not just the maquininha headline rate.

Cost Component	Low End	Typical Mid-Size Bar	High End	Notes
Maquininha rental (Cielo/Rede/GetNet)	R$0 (Ton/own device)	R$80–100/mo	R$150/mo	Corporate providers charge rental; Ton/Stone are purchase-based
PDV / comanda system	R$100/mo	R$250–400/mo	R$800/mo	Goomer R$40–699; Sischef R$350–800; Takeat R$300–800
Fiscal module (NFC-e)	Included	R$30–80/mo	R$80/mo	Often a separate add-on
Maquininha credit fee (commercial)	0.75% (Ton)	2.5–3.0%	4.30% (Cielo small)	Card-present; negotiable by volume
PIX fee	0% (Ton/MercadoPago)	0–0.35%	0.35%	Most low-cost providers offer free PIX
POS hardware investment	R$0 (phone-based)	R$300–800 one-time	R$800+	Amortized over 2–3 years
Marketing / customer acquisition	R$0 (word of mouth)	R$500–2,000/mo	R$5,000+/mo	Facebook/Instagram ads for local venues

4.2 True Total Cost of Ownership — Maquininha vs Dobar

Calculation for a mid-size bar with R$30,000/month GMV, mix 55% PIX / 35% credit / 10% debit:

Cost Item	Traditional (Maquininha + PDV)	Dobar @ 8% Commission (Regular)	Dobar @ 6% + R$199/mo (Master)
Monthly system / platform fee	R$300–450 (PDV + rental)	R$0	R$199
Payment processing fees	R$30k × 1.3% blended = ~R$390	Included in commission	Included in commission
Marketing / customer acquisition	R$500–1,500/mo	✅ Included (in-app discovery)	✅ + ad credits included
Hardware amortization	R$15–25/mo	R$0	R$0
Total fixed + variable cost	**~R$1,200–2,370/mo**	**R$30k × 8% = R$2,400/mo**	**R$30k × 6% + R$199 = R$1,999/mo**
Revenue uplift from reduced queues (+30%)	None	Generates R$9k extra GMV	Generates R$9k extra GMV
Effective cost on TOTAL GMV (with uplift)	~R$1,200–2,370 / R$30k	R$2,400 / R$39k = 6.15%	R$1,999 / R$39k = 5.13%

✅ **The Correct Pitch**

> Dobar does not promise lower raw payment processing fees than a physical maquininha — that would be false for e-commerce rates. Dobar promises lower total cost of commerce when accounting for: ordering system, customer acquisition, analytics, queue reduction revenue uplift, and zero hardware. At 8% commission on R$30k GMV, Dobar costs R$2,400 vs R$1,200–2,370 traditional — breakeven. But with 30% volume uplift from digital ordering, the venue earns R$9,000 more GMV, making the true effective rate 6.15%, beating traditional.

4.3 Recommended Revised Commission Structure

The current business plan proposes 18% (Regular), 14% (Master), 10% (VIP). Based on the Pagar.me gateway costs and competitive benchmarks, the following revised structure is recommended to maximize conversions while maintaining sustainable margins:

Tier	Commission Rate	Monthly Fee	Pagar.me Cost (blended ~3.6%)	Dobar Net Margin	Comparison Benchmark
Regular (free)	8%	R$0	~3.6%	~4.4%	vs iFood Basic 15.2% ⍰ −47%
Master	6%	R$199/mo	~3.6%	~2.4% + sub	vs iFood Basic 15.2% ⍰ −61%
VIP	4%	R$599/mo	~3.6%	~0.4% + sub	vs iFood Basic 15.2% ⍰ −74%

Why lower than the current business plan rates:

(a) Goomer offers R$0 commission (only monthly flat fee). At 18% Regular, a bar owner will evaluate Goomer's R$699/month for the same ordering functionality with zero per-transaction commission. At 8%, Dobar only wins vs Goomer at >R$8,750 monthly GMV, which is reasonable for a bar.

(b) iFood's retorno with 18% commission muddles the message. If Dobar charges 18%, early adopter bar owners will not see a material difference from iFood's Plano Básico (15.2%). The 8% rate creates a clear, memorable "half the iFood cost" positioning.

(c) VIP at 4% + R$599 works at scale. A high-volume bar at R$80k/month GMV: 4% = R$3,200 from transactions + R$599 subscription = R$3,799. At the old 10% VIP rate it was R$8,599 (transaction-only), pricing out exactly the venues Dobar wants as flagship customers.

4.4 Break-Even vs Goomer (Closest Competitor)

Monthly GMV	Goomer Advanced (R$699/mo, 0% commission)	Dobar Regular (0/mo, 8% commission)	Dobar Master (R$199/mo, 6% commission)	Verdict
R$5,000	R$699	R$400	R$499	Dobar wins
R$8,750	R$699	R$700	R$724	Breakeven Regular vs Goomer
R$10,000	R$699	R$800	R$799	Master slightly cheaper
R$15,000	R$699	R$1,200	R$1,099	Goomer cheaper on pure cost — Dobar value = app discovery + ads
R$25,000	R$699	R$2,000	R$1,699	Goomer much cheaper — Dobar

Monthly GMV	Goomer Advanced (R$699/mo, 0% commission)	Dobar Regular (0/mo, 8% commission)	Dobar Master (R$199/mo, 6% commission)	Verdict
				value must include significant volume uplift evidence

⚡ Strategic Implication

For venues doing R$15k–R$80k/month GMV, Goomer is cheaper on pure cost. Dobar must win on incremental revenue: in-app consumer discovery brings NEW customers that Goomer cannot — Goomer has no consumer app. This must be Dobar's core sales story. Target initially: new or growing bars that want customer acquisition, not established venues comparing raw fees.

5. Advertising & Campaign Pricing Strategy

Based on the ADVERTISING_PRODUCTS.md catalog (6 products: Featured Home Placement, Sponsored Search, Map Spotlight, Promotion Boost, Rich Media Banners, Promotional Badges) and Brazilian market benchmarks for local digital advertising, the following pricing is recommended for a Brazil launch.

5.1 Brazilian Digital Advertising Benchmarks (2026 Reference)

Format	Market Benchmark (Brazil)	Source Comparison
Local CPM (cost per 1,000 impressions)	R$8–25 (Facebook/Instagram local)	Meta Ads local radius targeting
CPC — local discovery app	R$1.50–4.00	Foursquare, Google Maps ads
CPH — venue featured placement	R$5–15/hour	iFood featured position, Rappi Premium
Push notification CPM	R$15–40	App retargeting benchmarks
Food delivery sponsored listing	R$3–12/hour	iFood Ads, Rappi Turbo

5.2 Recommended Pricing by Product & Tier

Product 1: Featured Home Placement (CPH — Cost Per Hour)

Package	Regular	Master (monthly credit included)	VIP (monthly credit included)	À la carte (any tier)
Included monthly hours	0	5 hours/mo (R$0)	20 hours/mo (R$0)	N/A
Extra hours — Standard visibility	R$4/hr	R$4/hr	R$3.50/hr	R$4/hr
Prime time (Fri/Sat 18h–24h)	R$8/hr	R$7/hr	R$6/hr	R$8/hr
Event boost (stadium/festival)	R$15/hr	R$12/hr	R$10/hr	R$15/hr
Min. purchase	R$20 (5h)	R$0 (credit)	R$0 (credit)	R$20 (5h)

Product 2: Sponsored Search Results (CPC + CPH)

Package	Master	VIP	À la carte
Monthly CPC credits	100 clicks/mo	500 clicks/mo	N/A
CPC rate — regular keywords	R$1.20/click	R$1.00/click	R$1.50/click
CPC rate — premium keywords (happy hour, craft beer)	R$2.00/click	R$1.80/click	R$2.50/click
CPH flat position guarantee	R$5/hr (top 5)	R$4/hr (top 3)	R$6/hr
Category Takeover 24h	Not available	R$150/day	R$200/day

Package	Master	VIP	À la carte
Keyword Block 12h	Not available	R$80/block	R$100/block

Product 3: Map Spotlight (CPH)

Package	Master	VIP	À la carte
Monthly credits	3 hours/mo	15 hours/mo	N/A
Standard hours	R$3/hr	R$2.50/hr	R$4/hr
Prime time (Fri/Sat evenings)	R$6/hr	R$5/hr	R$7/hr
Custom animation / brand ring (VIP only)	N/A	Included	R$2/hr surcharge

Product 4: Promotion Boost (CPM)

Reach Tier	Definition	CPM Rate	Min. Spend	Available To
Local (1–2km)	Neighborhood targeting	R$12/1k impressions	R$25	Master + VIP
District (2–10km)	District / neighborhood zone	R$10/1k impressions	R$50	Master + VIP
City wide	Full city radius	R$8/1k impressions	R$100	VIP only
Metro / event	Metro area or event venue radius	R$6/1k impressions	R$200	VIP only (bulk pricing)
VIP monthly credit	5,000 impressions included	R$0 (credit)	N/A	VIP

Product 5: Rich Media Banners (CPM + Minimum Spend)

Placement	Format	CPM	Min. Spend	Tier Required
Home Carousel (1200×400)	Static PNG/JPG	R$18/1k	R$100	Master
Home Carousel (1200×400)	Animated GIF/Lottie	R$25/1k	R$200	VIP
Search Interstitial (600×400)	Static	R$15/1k	R$80	Master
Post-Order (800×600)	Static or MP4 15s	R$30/1k	R$150	VIP
Push Notification (400×200)	Static	R$40/1k	R$100	VIP

Product 6: Promotional Badges — Included in Tier (No Charge)

Badge Type	Regular	Master	VIP
Auto badges (⚽□ □ □)	□ Automatic	□ Automatic	□ Automatic
Manual badge toggle	□	□ 3 types	□ All types

Badge Type	Regular	Master	VIP
Custom badge (request)	❌	❌	❌ Free (once/quarter)
Verified badge (✓)	❌	❌	❌ Included

5.3 Campaign Bundle Packages (Simplified Selling)

Rather than requiring bar owners to configure individual products (which raises cognitive load), offer pre-built campaign bundles as the primary sales motion. These can be bought à la carte or as monthly boosters on top of any subscription tier:

Bundle	Price	Contents	Best For
Starter Boost	R$99/mo	10h Featured Home + 50 clicks Sponsored Search + 5h Map Spotlight	New venues; first 90 days
Happy Hour Blaster	R$149/mo	20h Featured (Fri/Sat prime) + 3 Promotion Boosts + Flash Sale badge	Bars with active happy hour program
Weekend Warrior	R$249/mo	30h Featured (Fri/Sat/Sun) + 100 CPC Sponsored + 10h Map + push notify	Weekend-focused nightlife venues
Launch Campaign (one-time)	R$499	48h city-wide Featured + 2,000 CPM impressions + 200 CPC + verified badge	Grand opening or relaunch events
Event Takeover (per event)	R$999–R$2,499	Custom radius targeting + event badge + push notification blast + live featured	Live music, sports nights, themed events

5.4 Advertising Revenue Projection

Scenario	Venues	Avg Ad Spend/Venue	Monthly Ad Revenue	Notes
Conservative (20% attach rate)	100 venues	R$80/mo	R$1,600/mo	Early stage, mostly bundle packages
Base (35% attach rate)	400 venues	R$150/mo	R$21,000/mo	Mix of bundles + custom campaigns
Growth (50% attach rate)	1,000 venues	R$220/mo	R$110,000/mo	Premium tiers with event upsell
Scale (60% attach rate)	2,500 venues	R$300/mo	R$450,000/mo	Advertising as significant revenue pillar

5.5 Tier Value Summary — Updated With Ad Credits

Metric	Regular (Free)	Master (R$199/mo)	VIP (R$599/mo)
Transaction commission	8%	6%	4%
Monthly ad credits value	R$0	~R$80 in credits	~R$360 in credits

Metric	Regular (Free)	Master (R$199/mo)	VIP (R$599/mo)
Effective monthly fee (with credits)	R$0	R$199 − R$80 = R$119 net	R$599 − R$360 = R$239 net
Break-even GMV vs Regular	—	R$15,000/mo	R$30,000/mo
Recommended target GMV	<R$12k/mo	R$12k–R$50k/mo	>R$50k/mo
Account manager	❌	❌	✅ (50+ orders/day)
Priority support	❌	Email	Phone + Chat

6. Conclusions & Recommended Actions

6.1 Summary of Findings

Item	Finding	Impact on Dobar
iFood model	15.2–26.5% all-in take rate; own gateway (iFood Pay); weekly settlement cycle	Primary competitive benchmark — Dobar at 8% is dramatically cheaper
Zé Delivery model	Zero-commission; Ambev product distribution; no consumer ordering platform for in-venue	Not a competitor; potential strategic partner for Ambev bar network
Top competitor	Goomer (merged Abrahão): flat fee, zero commission, 400k venues — but NO consumer discovery app	Dobar must win on customer acquisition value, not raw fee comparison
Pagar.me e-commerce cost	~3.5–3.7% blended (PIX 2.19% effective; credit 4.98% effective on R$55)	Gateway costs are real; commission must exceed this; pitch must frame total COO
Physical maquininha	0.57–2.69% card fees (lower than e-commerce) + R$300–500/mo system cost	Don't claim "lower transaction fees"; claim "lower total cost of commerce with built-in growth"
Advertising potential	6 ad products viable; Brazilian local CPM R$8–25; CPH R$4–15; CPC R$1.20–2.50	Advertising can reach 20–30% of total revenue at scale; bundle packages simplify selling

6.2 Priority Action Items

Priority	Action	Owner	Timeline
P0	Revise commission rates to 8% / 6% / 4% across Regular / Master / VIP — update all investor materials, pitch decks, and in-app pricing screens	CEO	Before first venue onboarding
P0	Reframe marketing pitch: "half the cost of iFood with zero delivery dependency" — remove any claim of lower payment fees vs maquininha on raw transaction basis	CEO / Marketing	Immediately
P1	Monitor Goomer pricing and feature parity — set up competitive intelligence alert for any pricing changes above/below R$200/mo	CEO	Monthly review
P1	Negotiate volume discount with Pagar.me once reaching R$500k monthly GMV — target reducing blended rate below 2.5%	CEO / Finance	Q3 2026

Priority	Action	Owner	Timeline
P1	Launch 3 advertising bundle packages (Starter Boost, Happy Hour Blaster, Weekend Warrior) at go-live — bundle selling simplifies bar owner decisions	Product	Q3 2026 launch
P2	Evaluate Ambev / Zé Delivery partnership for joint bar network outreach and cross-sell	CEO / Partnerships	Q4 2026
P2	Build case study with 3 beta venues showing actual volume uplift % from digital ordering — this is the core data needed to justify the commission vs Goomer	Product / Success	Q3–Q4 2026
